

HIGHLY EFFICIENT AFTERMARKET PRODUCT TO REDUCE FUEL CONSUMPTION IN FLEET VEHICLES

What we do:	Who are our customers:
The REDUCTION Fuel Harmonizer™ is a small stainless steel stick, mounted either outside on the fuel-line or better in the fuel tank of any vehicle. This will reduce average fuel consumption by 6-25%.	The REDUCTION Fuel Harmonizer™ is a great way of reducing emissions and improving fuel consumption in vehicles of all sizes. Our product can make a big impact for corporate fleets of medium to large size.

REDUCTION Fuel Harmonizer™ – How It Works:

- The REDUCTION Fuel Harmonizer™ energizes and alters the molecular structure of the fuel, which in turn optimizes the combustion within gasoline, diesel and natural gas engines.
- Long hydro-carbon chains of the energized fuel are broken down into simpler gas-molecules in the combustion chamber which results in a more efficient and cleaner combustion process and lower toxic emissions as well as increased engine output.

References and international certifications:

- **TUEV SUED 2012** - leading independent certification body offering a variety of certification services to help you get products to market – equivalent to UL certification
Official tests with BMW 316 I
Certified result: fuel consumption reduced by 14.44% & 15.32%
Official tests with Mitsubishi Rosa, 26 Seater Bus
Certified result: fuel consumption reduced by 10.16% & 12.36%
- **Vienna, Austria 2014: Municipal Bus Fleet** – equivalent to Chicago Transit Authority / Los Angeles Metro
Test Vehicle: Mercedes Citaro 0530 EEV
Results confirm reduced fuel consumption of 10%-15%
Fleet-wide adoption of REDUCTION Fuel Harmonizer™ in 2014
- **National Board of Environmental Protection Brazil 2014** – equivalent to EPA USA
Approves the REDUCTION Fuel Harmonizer™ for usage in Brazil and awards “Selo Verde” (Green Seal).
- **MAN EURO 6 Test Station 2014**
Test confirms an increase in horsepower by 6%

Objective:

The REDUCTION Fuel Harmonizer™ is the perfect solution for corporate and governmental fleets to reduce fuel consumption and save money. RAISE Energy Solutions is interested in the opportunity to meet with fleet representatives, decision makers and technical representatives to showcase the benefits of the REDUCTION Fuel Harmonizer™ and demonstrate its functionality.
